

## DESIGNED TO SLIDE, BUILT TO LAST

ZAMTAS TECHNOLOGIES

SAFE | SMART | RELIABLE | EFFICIENT

### Automatic Sectional Garage Doors

Our sectional garage doors are expertly crafted using high-quality materials, providing exceptional durability and reliability. Choose from a wide range of modern and classic designs, complementing any architectural style. With smooth operation and precision engineering, our garage doors are an excellent addition to any home or business.

### Why Choose Sectional Doors?

1. Sectional doors require no space outside of the door to open, so the car may park very close while waiting for the door to open.
2. The multiple panels mean there's less pressure on the connection to the rail than for a monolithic door.
3. If one panel is damaged, it's easy to fix just this panel, making repairs affordable.
4. Flexibility with materials used, easy to provide practical things like security or ventilation or aesthetic finishes that match the house.
5. Sectional doors are more resistant to wind damage than roller doors.
6. Very secure.

## Technical Data:

- ❖ High-quality color steel garage doors.
- ❖ Sectional panels 40-50mm insulated, Italian Sheet Panels.
- ❖ Heat Resistant Doors, ideal for keeping your Garage areas cool during summer and save on heat losses during winter.
- ❖ Door Lift Panel options.
